

odor mitigation

100% organic odor control

CLEAN NXT utilizes an innovative technology that sets it apart from other products and solutions. At the heart of CLEAN NXT is a beneficial microbe and enzyme system that actually digests spills and materials that cause odor. Organic materials like sweat and wine are no match for this unique patented solution.

The active ingredients in CLEAN NXT are 100% natural. It meets the demands of brands and consumers for odor control without affecting the environment.

Brands can sell with confidence and consumers can purchase worry-free. Millions of square yards of carpet and carpet cushion have been installed in North American and European households under industry leading brands Odor-Eaters[®], Stainmaster[®] and Arm & Hammer[®]. Odors from footwear and even hockey gear are no match.

CLEAN NXT is a truly green solution for fresher fabrics and flooring.
